

For Immediate Release:

Easy Cut Studio now works with Siser Romeo, Siser Juliet and LOKLiK vinyl cutters.

Bring your ideas to life with Easy Cut Studio. Create unique, personalised designs in just a few clicks and take your crafting to the next level.

NEW YORK, United States, March 9th, 2025 – EasyCut, the developer of Easy Cut Studio - the world's most widely used vinyl cutting software - has released its latest version, which supports several of the most popular cutting machines on the market, including Siser Romeo, Siser Juliet, and LOKLiK iCraft. This updated version also brings a range of bug fixes, new features, and detail optimizations designed to streamline workflows and improve usability.

LOKLiK iCraft is a 13-inch smart craft cutting machine that is more like a Cricut. It combines a compact design, ultra precise cutting, scoring stylus, deep cutting and low-noise technology. With 5X cutting force, it has the ability to cut dozens of different materials, such as vinyl, paper, leather, gold foil, heat transfer paper, glitter cardstock, kraft cardboard, and etc. You can use this LOKLiK iCraft vinyl cutter and Easy Cut Studio to help make signs, logos, 3D boxes, cards, window decals, stickers, clothes, vehicle graphics, banners, wall decals and endless other crafts. With its upgraded stepper motor system and noise reduction technology, this die cutting

machine performing faster and quieter than any other vinyl cutters. Ideal for handicraft lovers of all levels.

Both the Romeo and Juliet cutting machines by Siser has been designed to be not only easy to use but advanced as well. Suitable for both beginners and experienced users. Key features include Optical eye for contour cutting, precision cutting, custom settings, no mat needed, and etc. Siser Juliet is a 12-inch (30cm) high-definition vinyl cutter, while Siser Romeo is a 24-inch (60cm) vinyl cutter, it includes all the features from Siser Juliet with double the cutting width, so you can cut your production time in almost half. it seamlessly adapts to various workflows, enhancing the creative process. Both Romeo and Juliet cutting machines can be connected to Easy Cut Studio via a USB cable, or via WiFi for a reliable wireless experience!

"Our software currently support more than 700 different models of vinyl cutters from around the world. and I'm really impressed with the cutting machines from Siser and LOKLiK. These are the most advanced vinyl cutters made today, and Easy Cut Studio now supports all of their advanced features on all versions of Windows and Mac OS X." says Eric Lee, senior product manager of EasyCut Software

Easy Cut Studio is the perfect companion for any vinyl cutter and cutting plotters, with a variety of sign designs, layout tools, and a built-in art library. You can create original artwork from scratch, import vector graphics, or choose image from the built-in library. The software enables bitmap-to-vector tracing functionality, add outline to graphic, automatically add registration mark, create rhinestones, apply various effects to text or images, nesting, weld shapes, variable data printing, print and cut, and so much more. All functions are integrated into a single software in Easy Cut Studio, making it easy and efficient to operate!
