

For Immediate Release:

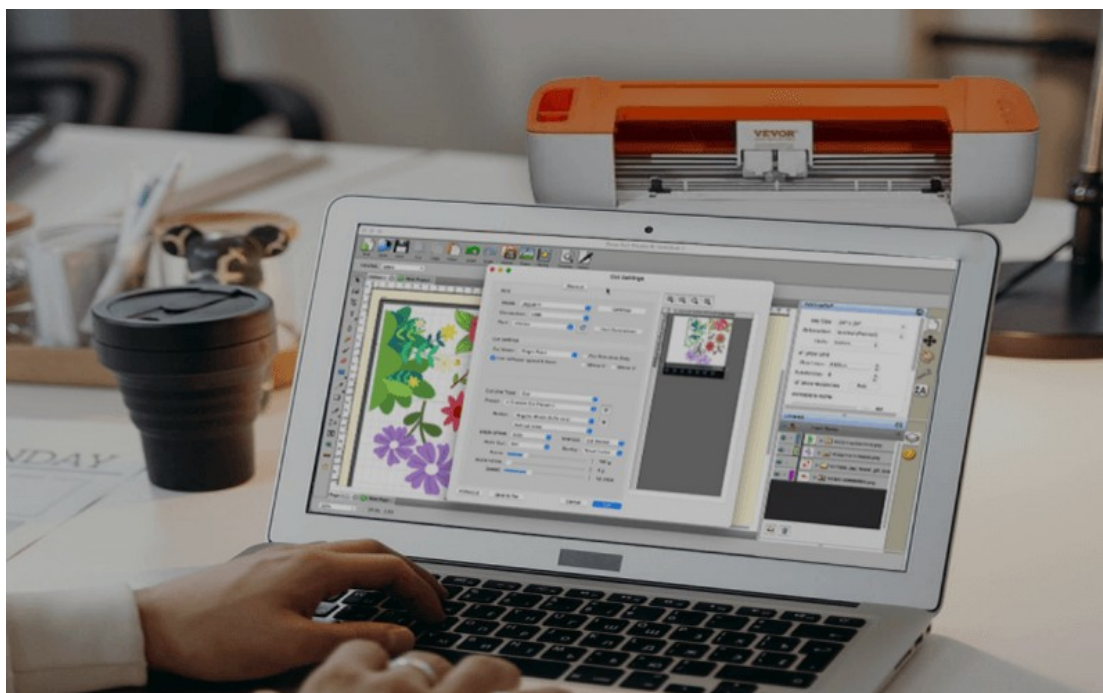

Easy Cut Studio 6.016 now available for Vevor Smart1, Vevor TT450 and Roland CM series cutters.

The world's easiest to use design-and-cut software is now available for Vevor Smart1, Vevor TT450, and Roland CM series cutters

NEW YORK, United States, January 23, 2026 – EasyCut, a cutting-edge company focused on sign making software solutions, today announced the official release of Easy Cut Studio 6.016, an upgrade of its sign design and vinyl cutting software. This updated version brings support for several new vinyl cutters, including Vevor Smart1, Vevor TT450, E-Cut TT-450, YOW! CraftY and Roland CM series cutters, and also brings a series of improvements aimed at enhancing the user experience and make your cutting machines run better.

[Easy Cut Studio](#) 6.016 builds on its solid set of functions and tools, while offering exciting new features, improvements, and efficiency, elevates excellence and performance for signage and professional graphic designers. With the newly added cutter support, more users can now use this innovative software to design, print, and cut. These enhancements allow beginners to get started quickly, while enabling seasoned experts to easily create more complex, technically advanced layouts with greater ease – and less time.

" We are very proud that our software is compatible with more models of cutting plotters, helping our customers achieve outstanding results. EasyCut has always been dedicated to simplifying complex workflows and making professional printing and cutting accessible to everyone", says Eric Johnson, Director of Global Marketing and Sales, EasyCut. "We are confident that printing and cutting with Easy Cut Studio Version 6.016 is more efficient than ever before, with the guarantee of delivering better results no matter the application."

Vevor Smart1 is a precise, versatile desktop vinyl cutter designed for creative and DIY projects. It features auto-adjusting blade pressure and auto-tracking for consistent, clean cuts. It supports over 100 materials (vinyl, cardstock, heat transfer, etc.) and various tools for cutting, writing, and fold lines, it's ideal for stickers, decals, apparel, home decor, labels, and signage. User-friendly and efficient, it suits beginners to pros, helping turn ideas into high-quality projects with less setup and fewer errors. Now Vevor Smart1 users can fully control the Vevor Smart1 cutting machine with Easy Cut Studio, effortlessly handling printing and cutting projects.

The E-Cut TT-450 and Vevor TT-450 are compact, entry-level auto contour vinyl cutting plotters ideal for DIY crafts and small businesses. Both models are produced in China, and their appearance and functions are basically identical. Both machines feature automatic contour cutting (via camera or edge detection) for precise print-and-cut applications, delivering $\pm 0.1\text{mm}$ accuracy at speeds up to 400mm/s. When using this machine with Easy Cut Studio, anyone can easily create custom stickers, labels, and signs.

In addition, Easy Cut Studio 6.016 also added support for the Roland CM series machines, including the CM-12, CM-24, and the older CM-300, CM-400, and CM-500. EasyCut is constantly updating Easy Cut Studio 6 to support new vinyl cutters as they are released and ensuring that old vinyl cutters remain supported, even when the manufacturer stops supporting these cutters.
